

SECTION D : Data Ethics, Governance & Careers.

29. Data privacy is the principle that a person should have control over their personal data, including the ability to decide how organizations collect, store and use their data.

Data privacy is important because :

- It Protects personal Information
- Prevents Identity theft and fraud. Builds Trusts.
- Supports Individual rights.

GDPR

The general Data Protection Regulation is a data protection and privacy law. Created by the EU. Purpose is to protect the personal data and privacy rights of individuals and to create consistent data protection rules across Europe. It mandates the collection of data, lawfully and transparently. Use data only for specified purposes, keep the data secure.

It applies to 27 EU members, France, Germany, Spain, Italy, Netherlands, Sweden, Portugal, Ireland, Belgium, Poland and all other EU member countries.

30. Data Ethics refers to the moral principles and standards that guide how data is collected, stored, analyzed, shared and used. It focuses on ensuring that data and AI technologies are used in ways that are fair, transparent, responsible and respectful of people's rights and privacy.
