

Pg 23

Example:

Amazon's recruiting AI learned gender bias from historical data and unfairly disadvantaged some female candidates. This leads to unfair treatment, discrimination and loss of trust.

33.

Role	Primary focus	Responsibilities	Key skills
Data Analyst	Understanding & reporting on data	Clean data, create reports, build dashboard identify trends, Answer business questions.	SQL, Excel data visualization
Data Scientist	Advanced Analytics and prediction	Build predictive models perform stats analysis	Python, statistics Machine learning
Data Engineer	Building data infrastructure	Design data pipeline integrate data source manage databases & data warehouse	SQL, ETL Cloud platforms data architecture
AI Engineer	Develop AI powered applications.	Train, deploy, maintain AI models & generative AI systems.	Machine learning, MLOps Frameworks
