

This process makes it easy to collect data, analyze, and come up with quality information to improve business. ETL is core to data warehouse, BI, and analytics, providing value making information in various organizations.

10. CVS (Comma-separated Values)

CVS is one of the simplest and mostly used data formats. Each line represents a record, and each field is separated by a comma. It's human-readable, lightweight, and easy to open in Excel or Google Sheets. Easy to read, supported by all tools, Not efficient for large data, it has no schema, no data types.

(JSON (JavaScript Object Notation))

JSON is a lightweight, text-based format used to store structured and semi-structured data. It's commonly used in APIs and NoSQL databases like MongoDB.
